Projects

Portfolio website

The website features a Home Page with sections including About Me, Resume/CV, and a Gallery showcasing achievements and awards. Additionally, it integrates seamlessly with social media platforms for enhanced connectivity.

Amazon Clone

The website includes essential features such as a Home Page with a Navigation Bar and Search Bar, Product Listings, Shopping Cart functionality, all complemented by a Footer for comprehensive user experience. Developed with Git for version control and deployed via GitHub Pages.

Music Website - Cancion

The platform offers robust User Authentication, CRUD Operations, an intuitive Artist Dashboard for efficient Song Management, along with Backup, Audit, Language, Mood Management, and Recovery features for enhanced functionality and data security.

Text Manipulation Website - Texto

Texto is a React-based web app for text manipulation and analysis. It allows case conversion, text reversal, and provides text statistics. Developed with Git for version control and deployed via GitHub Pages.

News Website - Readics

Readics is a web application designed to deliver up-to-date news articles across various categories. Users can browse news headlines, explore different topics such as Business, Entertainment, Science, Sports, Technology, and more. Developed with Git for version control and deployed via GitHub Pages.
